Problem Statement

Hair is probably one of the first things you notice about people when meeting them for the first time. This is especially true for women. Beautiful and shiny hair always leaves good impression, which is why proper hair care is important. Also, good care of your hair plays an important part in having healthy hair and helps avoid extensive damage that can lead to hair. Regular washing with celebrity advertised shampoos and conditioners is not enough. To have a healthy, strong and shiny hair, you need to know how to care for it daily. Since the field is really vast, a need is felt that there should be a single platform which will give the complete information of hair care.

Acknowledge

We would like to thank All-Mighty ALLAH who gave us courage to succeed in completing the First-Semester E-Project. Moreover, we would like to thank our Parents and Family Members who appreciated our work and granted the permission to work on this project late night. We would also like to thank our classmates who shared their ideas and comments to make this project look better every time. The software used in development of the project is Visual Studio 2019 and UI will be create in Figma and pictures are edited in Adobe Photoshop where needed. We were asked to make a user-friendly website on **“Hair Heaven”**.

We earnestly hope that our durable furniture will meet all your needs, providing both comfort and longevity. Our tips and methods ensure you can easily enjoy the best in home furnishings.

Project Plan

Days	Title	Description
6.	Setup A Project	<ul style="list-style-type: none"> Initial Project Structure: Organize the project directory with folders for CSS, JS, images, data, and docs. Design a Logo: Create a logo that represents the brand. Creating a UI: Design the initial user interface with HTML and CSS. Creating a Data Structure: Define the data structure for products in a Js file. Write Global CSS: Create global styles for buttons, headings, paragraph font sizes, section gaps, and banners to be used across all pages. Creating a Navigation Menu: Develop a responsive navigation menu. Creating a Header and Footer Section: Design consistent header and footer sections. Creating a Hero Section: Develop a hero section with a welcome message and call- to-action.
9.	Home Page Development	<ul style="list-style-type: none"> Creating a Navigation Menu: Develop a responsive navigation menu. Creating a Header and Footer Section: Design consistent header and footer sections. Creating a Hero Section: Develop a hero section with a welcome message and call- to-action. Product description

Offering 4 x protection* the Ceramic Glide 230 hair straightener includes additives infused within the coating for extra shine with less static, now with added titanium. Titanium is known to work as a great heat conductor, ensuring heat is spread evenly, helping to create shiny, sleek hair, minimizing any frizz or flyaway strands. The antistatic, tourmaline ionic and smooth glide additives infused into the ceramic coating ensure plates pass over the hair smoothly, protecting from snagging and additional breakage. FEATURES: 4 x Protection* - Anti Static - Ceramic windows. - Tourmaline Ionic - Smooth glide coating 8 temperature settings, 150-230°C Variable temperature control dial On/off Indicator LED Fast heat up to 15 seconds Floating
